

- due to watershed management.
1245. Samra, J.S. and Mishra, A.S. 1997. Watershed management: A strategy for sustained development. *Indian Fmg.*, 47(8):17-24 & 27.

Achievements of Bhaintain watershed (Tehri-Garhwal hills) and three watersheds located in degraded Shiwalik foothills at Sukhomajri and Bunga in Haryana and Relmaja in Punjab have been highlighted with relevant data and number of photographs. It has been stressed that watershed management has special role in implementing various soil and

water conservation practices for sustainability in agriculture, with minimum hazards to natural resources. Efficient watershed management serves the purpose of agricultural development, resulting in improvement in socio-economic condition of the people.
