

- 1266. Dhruva Narayana, V.V. 1985.** Soil and water conservation and watershed management. Lead Paper (Selected Topics) National Seminar on Soil Conservation and Watershed Management, New Delhi, Sept. 17-18, 1985: 133-150.

The paper brings out the variable rate of soil loss under different 'resource regions' based on the results obtained at CSWCRTI, Dehra Dun and its Research Centres. Specific packages of practices have been proposed for hill, ravine and black soils regions. The packages include various combinations of treatments covering soil management, agronomic and biological measures, engineering structures, hydrological and sedimentation details for cultivated areas, forests, grasslands, torrents, landslides, etc. The paper also deals with the watershed approach, technology transfer, involvement of people and training of personnel. While giving some of the economic analyses justifying formulation of the programmes and implementation of the same on watershed basis,
