

- 1269. Dhruva Narayana, V.V., Sastry, G. and Patnaik, U.S. 1990. Watershed Management. Technical Bulletin, Publications and Information Division, ICAR, New Delhi: 176 p.**

Broadly dealing with watershed management, the bulletin is an attempt to highlight the concepts and experiences as evolved at the Central Soil & Water Conservation Research and Training Institute, Dehradun and its regional Centres. There is a discussion on some of the disciplines involved and their contributions to watershed management and case studies are presented in which the Institute was intensely participating. A chapter giving the basic outlines of a watershed project report has been incorporated in the end.
