

- 1363. Arya, S.L., Mittal, S.P. and Agnihotri, Y. 1990.** Lab to Land Programme helps boost crop yields in the Nada village. *Indian Fmg.*, XL(6): 23-25.

It discusses the impact of lab-to-land programme on crop yields, use of inputs, employment generation and change in occupational structure in village Nada of Haryana State, after withdrawal of the programme. The results indicated that though the yields of maize and wheat came down by 24 and 29% after the withdrawal of the programme, these were still higher by 177 and 242% as compared to the yields before the programme. Similar favourable impact of the programme was noticed in other developmental aspects also.
