PREFACE

Fisheries have taken the centre stage in Indian economic growth. The information needs of the stakeholders in the sector have risen at a rapid pace. Though efforts have been taken by various agencies to reach out to the target population, their contributions have been always remained short of that required.

Information needs to be tailored to suit the needs of the clientele. When we address the needs of the seafood exporters or the industry or the financial institutions, information must be made available in a way that it caters to their needs and is in the form which is easily accessible to them.

The Non Government Organisations have been very active in the field of fisheries and aquaculture along the coast after the Tsunami. The needs of the fishermen and the residents of the coastal areas who have been affected by the calamity have also been oriented to seeking information on alternate livelihood options, employment and income generating activities and ancillary occupations that can help rebuild their lives. The NGOs are also playing a key role in such activities but often are constrained by lack of correct and useful information on various aspects of fisheries institutions, training programmes and information sources etc.

It is with a view to bridge this information gap that this compiled volume has been produced. It is hoped that this volume will serve as a ready reckoner to those catering to the information needs of stakeholders at the delivery level. The operators at the Village Knowledge Centres, Village Resource Centres and e-Choupal will find this an indispensable volume to advise the stakeholders at the marginal level who look up to these centers like the oasis in the desert.

This particular compilation has been made based on the request of National Virtual Academy, M. S. Swaminathan Research Foundation, Chennai.

The scientists who have been involved in bringing out this volume has done a yeomen's job which we hope will serve the end users very well. Nevertheless, it is requested that any doubts and clarifications can be made directly to us and we will be obliged to give the required information.

We would appreciate feedback on the usefulness of the information provided and suggestion on improvement in compilation.
