Description

Mango, Mangifera indica L., is one of the important commercial fruit tree crops in the world. It is grown in the tropical and subtropical climates, making it second to citrus in terms of production. India is the world's leading producer of mango with estimated production of 15 million metric tons.

"AAM-SURAKSHA" a mobile app provided by ICAR-Research Complex for Eastern region is for illustrative purpose only which provides farmers, scientist and development officers with insect and
