

- 124. Subhash Chandra, Khybri, M.L. and Ram Babu. 1979.** A simplified procedure for computation of kinetic energy of rain storm for erosion estimation equation. *Indian J. Soil Conserv.*, 7(1):17-20.

Using eleven years rainfall data from raingauge installed at Dehradun, a simple linear relationship has been established between the storm magnitude and its kinetic energy. This relationship provides a simple and rapid tool for the computation of kinetic energy (KE) and erosion index (EI) values of the rainstorms.
