

of 54.6 ha could be achieved by field bunding.

401. **Ram Babu and Agarwal, M.C. 1985.** Non-monetary cropping practices for higher production and protection-A review. *J. Indian Soc. Agri. Stat.*, 37(1): 113-115 (summary article No.16).

The paper reviews the research work carried out at CSWCRTI, Dehradun and its Centres, pertaining to non-monetary soil and water conservation measures like contour cultivation, strip cropping, mixed/intercropping, crop geometry, time of sowing, etc. The note indicates that though these methods involve no or little money, they are very effective in reducing
