

484. Singh, Gurmel, Koranne, K.D., Bhushan, L.S., Mohan, S.C. and Ghosh, S. 1981. Advances in Rainfed Farming. Bull. No. R-10/D-8, CSWCRTI, Dehradun. 106 p.

The bulletin is a compilation of results of various experiments carried out at CSWCRTI, Dehradun in the fields of agronomy, soil science, crop science and engineering to develop a package of practices for improving the yield levels of different crops and cropping sequences under the high rainfall and seasonally dry conditions of Doon Valley. The role of tillage, sowing methods, crops and varieties, weed control, water harvesting and recycling in increasing and stabilizing crop production, and results of practical utility have been

discussed with support of research data, figures and photographs.
