535. **Srivastva, A.K. and Singh, Gurmel. 1993.** Resource management aspects of farming systems. Proc., 88th Session, Indian Science Congress, Goa: 126.

The authors bring out that in the country about 90 million ha is degraded due to improper resource management and lack of system integration. Farming system approach offers range of options to help increase and stabilise farm production, deriving the beneficial interactions of system integration. In this paper, studies carried out at CSWCRTI and its Centres on integrated resource management in farming system have been presented and discussed.
