

567. Tyagi, P.C. and Singh, Gurmel. 1990. Crops and varieties for higher production, soil and moisture conservation under conditions of Himalayan region. Proc. Internl. Symp. on "Water Erosion, Sedimentation and Resource Conservation", Dehradun,

Oct. 09-13, 1990: 256-263.

The paper brings out that in Doon Valley, by growing improved short duration and high yielding crops and varieties as sole as well as in intercropping, the crop yields can be increased and stabilized in rainfed conditions even under subnormal rainfall years.
