

- 674.** Gupta, R.K., Arora, Y.K. and Shukla, D. 1981. In Doon Valley, growing fruits under rainfed conditions. *Indian Hort.*, 26(3):5-10.

Suitable cultivars of some fruit types which have been found promising on both good as well as degraded lands in Doon Valley under rainfed conditions have been discussed. Yield potentials of citrus species including lemon, sweet oranges, pummelo, sweet lime, mandarins and other fruit types like peaches, plum, phalsa and minor tree fruits have been presented with the support of data obtained at CSWCRTI, Dehradun.
