

690. Gupta, R.K., Agarwal, M.C. and Joshie, P. 1989. Economic evaluation of sisal with and without *bhabar* on bouldery wastelands of Doon Valley. *Indian J. Soil Conserv.*, 17(3): 39-44.

Comparison of three different intensities of harvest of *sisal* (*Agave sisalana*) leaves (25%, 50% and 75%) with and without *Bhabar* (*Eulaliopsis binata*) for economic utilization of the bouldery wastelands of Doon Valley was carried out at the Research Farm, Selakui (Dehradun) for 12 years (1975-1986). The study indicates that for economic utilisation of bouldery wastelands of Doon Valley, 50% harvest intensity of *sisal* leaves with *bhabar*
