

821. **Srinivasan, V., Verma, B., Thakur, J.V. and Bonde, W.C. 1970.** Some grasses for pasture development in the ravine lands. *Indian J. Agric. Sci.*, 40(3):268-272.

Results of a trial on six promising grass species conducted on the humps of ravines at

Vasad (Gujarat) during 1960-61 and 1961-62 indicated that *Cenchrus ciliaris* L. (Australia), *Cenchrus ciliaris* L. (rhizomatous), *Andropogon ischaemum* Roxb., *Amphilophis glabra* (Roxb.) Stapf. and *Dichanthium annulatum* (Forsk.) Stapf. were promising for pasture development in ravine lands of Gujarat. *Panicum antidotale* Retz. quickly deteriorated with age.
