

- 844. Verma, B. and Chinnamani, S. 1990.** Rehabilitation of ravine lands. In: Technologies for Wasteland Development, Eds. I.P.Abrol and V.V.Dhruva Narayana. ICAR Publication, New Delhi: 263-272.

Watershed approach to reclaim and rehabilitate ravine areas has been recommended. Gully reclamation classification has been described and conservation measures involving agronomical, hydrological, engineering, agri-horticulture, agroforestry, silvi-pasture and forestry aspects have been discussed to treat different types of gullies as per this classification. Locally suitable agricultural crops of improved genotypes are

suggested to reclaim gullies of 1,2,3 classes while for class 4 gullies having irrigation facilities, horticultural fruit trees are recommended.
