

- 870.** **Bhola, S.N. and Khybri, M.L. 1974.** A note on nature of clays in soils of *Chambal* command area. *Ann. Arid Zone*, 13(1):55-58.

Soils of Chambal command area have been described. The nature of clay mineral has been identified as montmorillonite by use of dehydration curves as adopted by Kelly *et al.* (1956). This is confirmed by high cation exchange capacity of clays.
