

885. **Goyal, S.K. and Sikka, A.K. 1981.** Estimating evaporation losses from reservoirs. *Irrigation & Power Jr.*, 48(4):31-40.

The paper describes the commonly used methods of estimating evaporation and also compares them to indicate the choice of method under the given situation. Evaporation from Bhadra Reservoir of Karnataka in the semi-arid region of the country has been estimated by the mass transfer and Penman method using the available climatological and reservoir water level fluctuation data.
