

- same with a model watershed which is under execution since 1974.
- 1265. Dhruva Narayana, V.V. 1982.** Efficient use of environment. Invited paper, National Seminar on "A Decade of dryland agriculture in India and thrust in the 1980's", AICRPDLA, Hyderabad. In: Dryland Agricultural Research in India: Thrust in the Eighties" (Eds.) R.P.Singh & V.Bala Subramanian, AICRPDLA, Hyderabad: 113-119.

Dealing with the environmental problems, the paper suggests that soil and water conservation education should be practical in nature and demonstrate, at operational level, how soil conservation could sustain the community, generate the employment and create health, wealth and welfare for the people.
