

1298. Ram Babu, Dhyanani, B.L., Agarwal, M.C. and Samra, J.S. 1997. Economic Evaluation of Watershed Management Projects (Concepts, Methodologies and Case Studies)

(Ed. R.P. Singh) . Bulletin No. T-33/D-23, CSWCRTI, Dehradun 248195: 83 p.

The authors have attempted to outline major ingredients of the conceptual structures and methodology of project evaluation. The economic evaluation of some of the soil and water conservation experiments/projects and watershed management projects carried out at the Research Institutes, State Departments and other Central or State Organizations, etc. in India through Operational Research Projects, River Valley Projects, Flood Prone Area Programmes and various soil and water conservation programmes have been presented. The sociological, political, economical and religious issues associated with soil and water conservation programmes are also highlighted. Indirect/intangible benefits obtained from various soil and water conservation measures have also been presented.
