Definition of Scheduled Tribes

The term 'Scheduled Tribes' first appeared in the Constitution of India. Article 366 (25) defined "Scheduled Tribes" as "such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are deemed under Article 342 to be Scheduled Tribes for the purposes of this constitution". Article 342, which is reproduced below, prescribes procedure to be followed in the manner of specification of scheduled tribes.

As per the Article 342, the President may, with respect to any State or Union territory, and where it is a State, after consultation with the Governor thereof, by public notification, specify the tribes or tribal communities or parts of or groups within tribes or tribal communities which shall for the purposes of this constitution be deemed to be Scheduled Tribes in relation to that State or Union territory, as the case may be.

Parliament may by law include in or exclude from the list of Scheduled Tribes specified in a notification issued under clause(1) any tribe or tribal community or part of or group within any tribe or tribal community, but save as aforesaid a notification issued under the said clause shall not be varied by any subsequent notification. Thus, the first specification of Scheduled Tribes in relation to a particular State/Union Territory is by a notified order of the President, after consultation with the State governments concerned. These orders can be modified subsequently only through an Act of Parliament. The above Article also provides for listing of scheduled tribes State/Union Territory wise and not on an all India basis. The criterion followed for specification of a community, as scheduled tribes are indications of primitive traits, distinctive culture, geographical isolation, shyness of contact with the community at large, and backwardness. This criterion is not spelt out in the Constitution but has become well established. It subsumes the definitions contained in 1931 Census, the reports of first Backward Classes Commission 1955, the Advisory Committee (Kalelkar), on Revision of SC/ST lists (Lokur Committee), 1965 and the Joint Committee of Parliament on the Scheduled Castes and Scheduled Tribes orders (Amendment) Bill 1967 (Chanda Committee), 1969.

In exercise of the powers conferred by Clause (1) of Article 342 of the Constitution of India, the President, after Consultation with the State Governments concerned have promulgated so far nine Orders specifying the Scheduled Tribes in relation to the state and union territories. Out of these, eight are in operation at present in their original or amended form. One Order, namely, the Constitution (Goa, Daman & Diu) Scheduled Tribes Order 1968 has become defunct on account of reorganization of Goa, Daman & Diu in 1987. Under the Goa, Daman & Diu Reorganization Act, 1987 (18 of 1987), the list of Scheduled Tribes of Goa has been transferred to Part XIX of the Schedule to the Constitution (Scheduled Tribes) Order, 1950 and that of Daman & Diu in Part II of the Schedule to the Constitution (Scheduled Tribes) (Union Territories) Order, 1951.

The State-wise List of notified Scheduled Tribes in India is shown in Annexure I

About Tribal Sub Plan (TSP)

The strategy of Tribal Sub-Plan (TSP) is in force since 1974, to ensure adequate flow of plan resources for the development of Scheduled Tribes while the strategy of Scheduled Caste Sub Plan (SCSP) (earlier known as Special Component Plan for Scheduled Castes) is in force since 1979-80, to ensure proportionate flow of plan resources for the development of Scheduled Castes. The current name, i.e. Scheduled Caste Sub Plan (SCSP) is in force since 2006. The Prime Minister, in his address to the 51st Meeting of the National Development Council on 27.6.2005, had *inter alia*, stated as follows:

"If the benefits of growth have to reach all sections of our diverse society, there is a need to equip them with the necessary skills and resources to become active participants in growth processes. This is the only way of achieving our dream of an inclusive, prosperous society. In the mid-1970s, the Special Component Plan and the Tribal Sub-Plan were initiated. Tribal Sub- Plans and Special Component Plans should be an integral part of Annual Plans as well as Five Year Plans, making provisions therein non-divertible and non-lapsable, with the clear objective of bridging the gap in socio-economic development of the SCs and STs within a period of 10 years"

Guidelines on formulation, implementation and monitoring of SCSP & TSP have been issued by the Planning Commission from time to time. Consolidated guidelines in this regard were last issued to 62 Central Ministries/Departments in December, 2006, for the implementation from the Annual Plan, 2007-08. According to the guidelines, the 62 Central Ministries/Departments are required to:

- a) Earmark funds under SCSP/TSP from the Plan outlay, at least in proportion of percentage of SC and ST population in the country, which was 16.2% and 8.2% respectively, as per census, 2001.
- b) Place the funds earmarked for SCSP under a separate Minor Head '789' and for TSP under Minor Head '796' below the functional major Head/Sub-Major Heads to ensure their nondivertibility to any other scheme.

The Planning Commission set up a Task Force to Review Guidelines on Scheduled Castes Sub-Plan (SCSP) and Tribal Sub-Plan (TSP) in June, 2010 under the Chairmanship of Dr. Narendra Jadhav, Member, Planning Commission to re-examine and revise the extant Guidelines issued by the Planning Commission for implementation of SCSP and TSP and to understand the operational difficulties in consultation with implementing Ministries and suggest remedial action so that SCSP

and TSP can be implemented effectively. The Task Force held a number of meetings to discuss the issue of revising the Guidelines. Consultations were also made with Central Ministries/Departments so as to ascertain the feasibility of earmarking of SCSP and TSP outlay in proportion to the population percentage of Scheduled Castes and Scheduled Tribes as per Census 2001. In the process of consultation, it emerged that 68 Ministries/ Departments can be grouped into four categories: I) No Obligation; II) Earmarking less than 15% for SCs and 7.5% for STs; III) Earmarking outlays between 15% -16.2% for SCs and 7.5% - 8.2% for STs; IV) Earmarking more than 16.2% for SCs and 8.2% for STs. The details of categorization of the Central Ministries/ Departments are given in Annexure II and III. As per the Proposed Earmarking of Plan Outlays under TSP for 2011-12 for Department of Agriculture Research & Education is 3.6%. The Schemes for Tribal Development that are in operation are given in Annexure IV.

From the year 2011-12, allocations are being made for Scheduled Castes Sub Plan (SCSP) and Tribal Sub Plan (TSP) under separate minor heads as part of the Plan allocations. During 2011-12, Rs 18,625.91 Crores was the total allocation to TSP which constituted 5.6 % of the total budget (Rs 335521.00 Crores) for Central Plan allotted. In 2012-13, the allocation for TSP in 2012-13 is Rs 21,710 Crores representing an increase of 17.6 per cent over 2011-12.

Statistics on Scheduled Tribes (STs) in India

The Statistics on State-wise Demographic Status of Scheduled Tribes as per Census 2001 in proportions to the total population (Table 1 & Fig 1 & Table 1), the Percentage of Tribal population more than the country's average of 8.2% (Table 2), the Literacy rate of total population and Scheduled Tribes Population and Gap in Literacy rate (Table3), Land- Number and Area of Holding according to Size for Scheduled Tribes(Table 4), the State-wise Percentage of population Below Poverty Line -social groups wise(Table 5) and the Incidence of Poverty among STs in Different States/UTs (Table 6) are presented in the Tables as indicated.

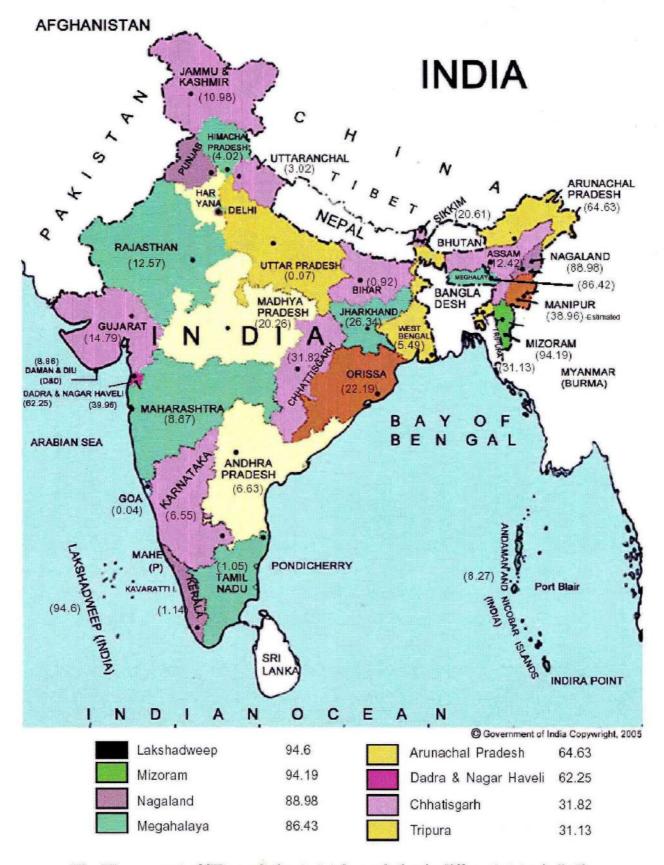

Fig: The per cent of ST population to total population in different states in India

Implementation of TSP in ICAR

Consequent upon the implementation of the recommendations of Task Force constituted under the Chairmanship of Dr. Narendra Jadhav, Member, Planning Commission for review of the operational guidelines implementing of Tribal Sub-Plan (TSP), the Competent Authority in the Indian Council of Agricultural Research has created a 'Tribal Sub-Plan (TSP) Cell' at ICAR Headquarters. This cell shall function under the overall supervision of the Liaison Officer for Scheduled Caste/Scheduled Tribe who would also be the Nodal Officer for ensuring effective and meaningful implementation of the Tribal Sub Plan. While the allocation of funds for Tribal Sub-Plan under Plan outlay shall be the responsibility of the PIM Section of the Council, the TSP Cell would be responsible for proper monitoring of Tribal Sub-Plan funds and also for looking after the interests of Scheduled Tribes in the Council with the clear objective of bridging the gap in socio-economic development of the Scheduled Tribes.

Tribal Sub Plan (TSP) is the Scheme in operation for welfare and development of Scheduled Tribes in India. Budget allotted under this scheme is channelized through various development departments and Research Organizations including ICAR. As ICAR is having coordinated Projects on different crops and themes various technologies have been developed for the benefit of agriculture development in general and farmers in particular. As the development of tribals in the country is one of the national agenda, many schemes operate for welfare of Scheduled Tribes in India. One such scheme is TSP.

Implementation of TSP in AICRN on Underutilized Crops

The rationality of implementing TSP through AICRN on UU Crops is that many of the UU crops dealt under the scheme are nutritionally potential. These UU crops are regional specific based on the prevailing Agri Eco-system. Since time immemorial, few UU crops are main food and nutritional security crops for the Tribals. Use of local varieties, limited knowledge of scientific cultivation and value addition of the crops are major issues to be addressed to make the cultivation of UU Crops more attractive and useful for the tribal development. In this context, the high yielding varieties developed in different UU Crops being dealt under AICRN on UU Crops in different states need to be introduced and popularized in Tribal areas. The scientific cultivation, preparation and use of value added products and their consumption procedures need to be educated through awareness programmes, field demonstrations, training programmes, providing literature, etc.

During the year 2011-12, Network Coordinating Unit of AICRN on UU Crops, NBPGR, New Delhi was allotted Rs.14.00 lakhs under TSP to conduct awareness programmes to popularize the nutritional benefits of UU Crops through selected few main centers of AICRN on UU Crops operating in different states. Ten centers were allotted budget by the Network Coordinator based on

the proposals received by the centers indicating the type of programmes to be taken up to promote UU crops for Tribal development following the stipulated guidelines laid out for implementation of TSP budget.

Details on TSP budget allotment and budget utilized by different centers under AICRN
UU Crops Network Scheme

S. No.	Name of the center	Amount allotted (Rs.)	Amount utilized (Rs.)	Remarks	
1	Rajasthan Agriculture University (RAU), Agricultural Research Station Mandor, Jodhpur 342 304	1,00,000.00	31595.00	Popularization of cultivation of Grain amaranth in tribal belt of Rajasthan	
2	Orissa University of Agriculture & Technology, Bhubaneswar 751 003	1,00,000.00	1,00,000.00	Awareness generation programme (Grassroot training) on underutilized crops in tribal areas of Odisha	
3	Sardar Krushinagar Dantiwada Agri. Univ. (SDAU), Sardar Krushinagar, Distt. Banaskantha 385 506	2,01,000.00	67356.00	Awareness generation in programme on Grain Amaranth cultivation in Gujarat state	
4	Tamil Nadu Agriculture University (TNAU), Forest College & Research Institute Mettupalayam 641 301	1,87,500.00	1,87,500.00	Popularization of cultivation of Grain amaranth in Tamil Nadu	
5	Mahatma Phule Krishi Vidhyapeeth (MPKV), Rahuri 413 722	1,85,700.00	1,78,215.00	Awareness programme for cultivation of Kankoda and Grain amaranth in Maharashtra state	
6	CSK Himachal Pradesh Krishi Vishwavidyalaya, Palampur 176 062	71,000.00	52,620.00	Demonstration of improved cultivation technology and value addition of underutilized crops	
7	College of Forestry & Hill Agriculture (GBPUAT), Ranichauri 249 199	1,02,900.00	46,700.00	Training programme on production technologies of underutilized crops for hill tribals of Uttarakhand state	
8	University of Agricultural Sciences, GKVK Bangalore 560 065	1,83,900.00	1,78,685.00	Creating awareness on growing and use of Grain Amaranth in Selected tribal areas of Karnataka state	
9	Birsa Agricultural University, Ranchi 834 006	1,00,000.00	72,072.00	Training on improved crop varieties, methods of cultivation to ensure sustainable and good quality marketable crop produce for increased income through use of different underutilized crops	

S. No.	Name of the center	Amount allotted (Rs.)	Amount utilized (Rs.)	Remarks
10	Indira Gandhi Krishi Vishwa Vidalaya, Ambikapur	1,68,000.00	nil	Popularization of Kankoda, Rice bean and amaranth among tribals of Chhattisgarh
	Total	14,00,000.00	9,14,743.00	

The details of implementation and impact of the programmes taken up by the centres is compiled. In addition, the constraints in implementing the proposed activities and suitable suggested strategies for further improving the TSP programmes are documented and presented center wise.

Rajasthan Agriculture University (RAU), Agricultural Research Station Mandor, Jodhpur 342 304

1. Centre Name : Agricultural Research Station (SK RAU), Mandor, Jodhpur

Place of programme with district and State

: Village: Harmatia, Annadara, Distt. Sirohi, Rajasthan

2. No. of training programme:

One (Awareness programme on importance of underutilized Crops and their improved Package of Practices, information on financial support from Bank for agriculture, Livestock management and their nutritional requirement etc.)

Funds utilized

: Rs. 31595/-

3. No. of participant in each training programme : 84 including 30 tribal women along with names of dignitaries, if any

4. Types of Tribal & Tribal population of the : Garasia, Meena, Bheel; Agriculture and state covered and their source of livelihood

livestock raring

5 Trial Agricultural scenario like crops of : Kharif: Castor, Maize cultivation etc.

Rabi: White, Gram, Mustard and

vegetable like tomato

6 Gaps **Economics** in & empowerment

Nutritional: Gap exists in economics and nutritional

empowerment in tribal races

7 What is TSP intervention to support these: issues by promoting programmes on UU Crops

Trainings, front line demonstrations and

field days are required to promote

underutilized crops

8 What kind of programmes that have taken up : under TSP any suggestion to make it more effective

Front line demonstration to show impact

of improved technology of underutilized

crops should be taken in the tribal area

9 Impact created through the programme

: Increase awareness in tribal about

nutritional importance of underutilized

crops

10 Constraints in promoting/implementing the programmes:

Ill-literacy, small holding, poor financial status of tribal, unavailability of improved technology of crops, poor extension network etc.

- 11 Suggested strategies:
 - Trainings, front line demonstrations and field days are required to promote underutilized crops
- Photographs showing activities, newspapers : Enclosed clippings in different languages (especially in local)

24.03.2012

2. No. of training programme

: 2 (Two)

Funds utilized

Rs.1,00,000.00 (@ Rs. 50,000.00 each)

3. No. of participants in each training : programme along with names of dignitaries, if any

100 each (Total 200 particapants in two programmes)

4. Types of Tribal & Tribal population of the : state covered and their source of livelihood

SC, ST & tribals (Kandha)

Source of livelihood: Agriculture and

minor forest product.

5 Trial Agricultural scenario like crops of : Small millets, Ragi, Maize, Mahua, Rice, cultivation etc.

Small millets, Ragi, Maize, Mahua, Rice, Vegetables (Beans, tomato, cabbage, cauliflower, Brinjal etc.), Ginger & Turmeric.

6 Gaps in Economics & Nutritional empowerment

Nutritional: The farmers are very poor and they do not get nutritious food in their daily food habit.

7 What is TSP intervention to support these : issues by promoting programmes on UU Crops

Definitely TSP will improve their standard of living and will provide nutritious food

8 What kind of programmes that have taken up under TSP any suggestion to make it more effective

Awareness programme on Rice bean and Grain amaranth.

Suggestion to make it more effective:Front Line Demonstrations (FLDs) should be conducted to enhance the area and production of the above crops

9 Impact created through the programme

: The tribal farmers showed their interest to grow these crops and impact study will be done in the next year.

Constraints in promoting/implementing the : Ill-literacy, small holdings, poor transport 10 programmes

& financial status of tribals, unavailability of improved technology of crops, poor extension network etc.

Suggested strategies 11

: Sufficient funds to provide input requirement to promote growing of underutilized crops required.

Photographs showing activities, newspapers: Photographs attached 12 clippings in different languages (especially in local)

District : Banaskantha State : Gujarat Date: 27.02.2012

Village: Amirgadh District: Banaskantha State: Gujarat Date: 02.03.2012

2. No. of training programme

: Two

Funds utilized

: 67356.00

3. No. of participants in each training programme along with names of dignitaries, if any

Participants for the training programme at

Virampur: 100

Participants for the training programme at

Amirgadh: 150

4. Types of Tribal & Tribal population of the : state covered and their source of livelihood

Dungasiya, Damor, Bubadiya, Dhabhi,

Bhagora etc.

5 Trial Agricultural scenario like crops of : cultivation etc.

Bajara, Maize, Wheat, Mustard, Funnel, Green gram, Karingada (as inter crop), Kankoda (naturally grown in hilly area)

6 Gaps in Economics & Nutritional : The empowerment nutri

The tribes are economically and nutritionally have poor status.

7 What is TSP intervention to support these issues by promoting programmes on UU Crops

: *Creating awareness on improved package of practices for cultivation of Grain amaranth, Kankoda and Karingada.

* Introduction of Improved varieties of Grain amaranth and Karingada.

* Creating awareness on nutritional importance of Grain amaranth, Kankod and Karingada.

8 What kind of programmes that have taken up : under TSP any suggestion to make it more : effective

Awareness generation programme to promote Under Utilized Crops (Grain amaranth, Kankod and Karingada) and improved package of practices for their cultivation, in tribal areas of the region.

Suggestion:

To make the programme more effective, provide agri. inputs to grow the crop in the tribal area

The funds should be released in the beginning of the financial year to plan the programme very effectively

9 Impact created through the programme

- : The tribals are convinced to grow Grain Amaranth and Karingada as pure crop or mixed crop
 - * The tribal farmers are also convinced to grow Kankoda commercially and get maximum price benefit through proper marketing.
- 10 Constraints in promoting/implementing the : Ill-literacy, small holding, poor financial programmes

Ill-literacy, small holding, poor financial status of tribal, unavailability of improved technology of crops, poor extension network. Not properly developed marketing channel particularly for Kankoda

11 Suggested strategies:

- * To make the programme more effective funds to provide inputs to grow the crop required.

 * The funds should be released in the beginning of the financial year to plan the programme very effectively.
- 12 Photographs showing activities, newspapers : Attached clippings in different languages (especially in local)
- 13 Publication/Literature printed under TSP budget. : Enclosed

PHOTOS

Tamil Nadu Agriculture University (TNAU), Forest College & Research Institute Mettupalayam 641 301

1. Centre Name : Forest College and Research Institute,

TNAU, Mettupalayam 641301

Place of programme with district and State

: Totally: 3

Two programmes in Uthagamandalam,

Nilgiris District, Tamil Nadu

One Programme in FC&RI,

Mettupalayam, Coimbatore District,

Tamil Nadu

2. No. of training programme : 3 (three)

Funds utilized

: Rs.1,87,500/- (@ Rs.62,500/- per

training)

No. of participant in each training programme: Totally 430 participants for three training 3. along with names of dignitaries, if any

programmes

4. Types of Tribal & Tribal population of the state covered and their source of livelihood:

Kotas, Todas, Kurumbas, Irulas of Nilgiris

Tribal population of the state covered: 90% of the tribes of Tamil Nadu (total population of tribes is 6,51,321) live in Nilgiris and around 430 attended the training during 2011-12.

Their source of livelihood: Farming and NTFP from Forests

5 Trial Agricultural scenario like crops of cultivation etc.:

Tribes of Nilgiris are predominantly farmers and cultivators and they are much dependent on forest lands. They cultivate mostly vegetables like potato, carrot, cabbage, garlic, beans, millets, amaranth and other vegetables

6 Economics & Gaps in empowerment

Nutritional: Both are far from satisfactory; there are

gaps as reported by many studies and

reports

7 What is TSP intervention to support these issues by promoting programmes on UU Crops:

Awareness creation through TSP trainings to bridge the gap in economic and nutritional empowerment; promoting crops like grain amaranth in these areas improve the nutritional security

8 What kind of programmes that have taken up under TSP any suggestion to make it more effective:

Three one day training programmes organized covering a total of 430 tribes representing 4 tribal

groups of Nilgiris

Suggestion to make it more effective

Training on cultivation and value addition to be given to the women tribes to increase their nutritional and socio-economic empowerment

9 Impact created through the programme:

Following the trainings conducted, few tribes expressed their interest to conduct FLDs of grain amaranth in their farm lands

10 Constraints in promoting/implementing the programmes:

- 1. Access to tribal area
- Tribes don't come out of their area for overnight stay if training of more than one day is organized

11 Suggested strategies:

- 1. More number of training programmes to be conducted
- 2. In situ awareness programmes in tribal villages
- 3. Training on value addition to be imparted
- Photographs showing activities, newspapers : Enclosed clippings in different languages (especially in local)

இயற்கை உணவை சாப்பிட்டால் ஆரோக்கியமாக இருக்கலாம்'

மேட்டுப்பாளையம், மார்ச் 22 -''இயற்கையான உணவை சாப் பிட்டால், உடல் ஆரோக்கியமாக இருக்கலாம்'' என, வனக்கல்லுாரி முதல்வர் துரைராசு பேசினார்.

மேட்டுப்பாளையம் வனக்கல் லூரி மற்றும் ஆராய்ச்சி நிலையம், டில்லி இந்திய வேளாண் ஆராய்ச்சி குழுமத்துடன் இணைந்து, மலை வாழ் மற்றும் ஆதிவாசி மக்களுக் காக, இலவச பயிலரங்கை நடத்தி யது. இதில், முழுமையாக பயன்ப டுத்தப்படாத, பயிர்கள் அறிமுகம் மற்றும் சாகுபடி குறித்து, பயிற்சி அளிக்கப்பட்டது.

வனக்கல்லூரி முதல்வர், துரை ராசு தலைமை வகித்து, பேசிய

இந்திய மக்கள் தொகையில், 45 கோடி பேர், பல்வேறு நோய்களால் பாதிக்கப்பட்டுள்ளனர். இதில், 30

சர்க்கரை, இருதய, கோளாறு ஆகிய நோய்களால், தற் போது கிராம மக்களும் பாதிக்கப் பட்டுள்ளனர். இதற்கு காரணம், பட்டுள்ளனர். இதற்கு காரணம், உணவு மற்றும் பழக்க வழக்கங்க காரணம், ளில் மாற்றம் தான் என, கண்டறியப் பட்டுள்ளது.

ஒரு காலத்தில் மலைவாழ், பழங் குடி மற்றும் ஆதிவாசி மக்கள், தினை, வரகு, சாமை, சோளம், பிட்டு வந்தனர். இயற்கை உணவை சாப்பிட்டு வந்ததால், அவர்கள், வனக்கல்லூரி ஆரோக்கியமாக இருந்தனர்.

பயறு ஆகியவற்றில், புரதம், மாவு, பெறு ஆகம்வற்றாக புரும். கொழுப்பு ஆகிய சத்துகள் உள்ளன. நமது உடலில், இந்த சத்துகள், சீரான அளவில் இருக்க வேண்டும்.

சிறுநீரக யில்லை; இது, குறுகிய காலப் பயி ராகும்.

இந்த உணவு வகைகளை, குழந் தைகளுக்கு கொடுத்து வந் தால்,நோய் எதிர்ப்பு சக்கி அதிகரிக் கும். எனவே, இப்பயிர்களை, மலைவாழ் மற்றும் ஆதிவாசி மக்கள், பயிர் செய்து பயன்பெற வேண்டும்.

இவ்வாறு, துரைராசு பேசினார். கம்பு, பனிவரகு, மக்காச்சோளம், பயிலரங்கத்தில், 30க்கும் மேற் பாசிப்பயறு ஆகிய பயிர் வகை பட்ட மலைவாழ் கிராமங்களில் களை, பயிர் செய்து, உணவாக சாப் இருந்து, 130க்கும் மேற்பட்டவர் கள், பங்கேற்றனர். இவர்களுக்கு, பேராசிரியர்கள் தானியக்கீரை, அரிசிப்பயறு, சொர்க் சைமரூபா, தானியக்கீரை, அரிசி கமரம் ஆகியவற்றின் சாகுபடி குறித் தும், அதன் பயன்பாடுகள், மதிப்புக் தொழில்நுட்பங்கள் பற்றி On L. B யும், பயிற்சி அளித்தனர்.

பாடுக்கப்பட்டுள்ளனர். இதில், 30 சீரான அளவில் இருக்க வேண்டும். இட்ட அலுவலர் குமரன், வரகோடி பேர் கோடி பேர் சேர்ந்தவர்கள் TSP Training at Mettupalayam - Dinamalar 22.3.2012, நன்றி கூறி குதி மக்களுக்கு மட்டுமே இருந்த னத்தற்கும் அதிகம் தண்ணீர்தேவை னார்.

along with names of dignitaries, if any

Sau. Dr. Rajanitai Chaudhari Wife of Dr.

Sudhir Chaudhari (MLA – Raver)

4. Types of Tribal & Tribal population of the : Tadvi, Barela, Pawara, Bhilla & Banjara state covered and their source of livelihood

5 Trial Agricultural scenario like crops of cultivation etc.:

The tribal peoples of Maharashtra most found in the area of Sahyadri & Satpuda hill also some area found in the dense forest area of Vidharbha region. Tribal peoples of Maharashtra mostly sown millets crops like Fingermillet, Prosomillet, Barnyardmillet, Kodomilliet. In some parts tribal people taken upland Rice & Niger crop as a oil seed crop. The Kankoda, Ricebean Colocassia, wingedbean & other cucurbitaceous crops area the main vegetable crops of tribal people during kharif season. In Rabi season were irrigation is available the tribal people sown Amaranthus crop for vegetable as well as grain purpose. The area & production under different minor crops are not available in Maharashtra.

6 Gaps in Economics & Nutritional empowerment:

The living standard of tribal people in Maharashtra state is very low due to less holding of lands, irrigation, less knowledge of farming. They are mostly depend on the forest produce like gum, honey, collection of medicinal plants, selling timber for fuel purpose for his stomach feeding.

Also tribal people received less money from selling of cattle & other animal due to illiterate. Tribal people mostly consumed less nutritious foods

7 What is TSP intervention to support these issues by promoting programmes on UU Crops:

- 1. Conducting awareness programme regarding importance of UU crops in tribal area to increase productivity.
- 2. For conducting large scale training & crop demonstration programme at village level.
- 3. Providing free quality seed materials of Kankoda, Ricebean & Simarouba along with package of practices.
- 4. Adopt four to five selected village for consecutive three year as a awareness programme i.e.

Cluster forming of UUCs.

5. Need to provide seed, fertilizers, pesticides, irrigation facilities & other inputs to the tribal people through TSP funds.

8 What kind of programmes that have taken up under TSP any suggestion to make it more effective:

- 1. Conducting awareness programme regarding importance of UU crops in tribal area to increase productivity.
- 2. For conducting large scale training & crop demonstration programme at village level.
- 3. Providing free quality seed materials of Kankoda, Ricebean & Simarouba along with package of practices.
- 4. Adopt four to five selected village for consecutive three year as a awareness programme i.e. Cluster forming of UUCs.
- 5. Need to provide seed, fertilizers, pesticides, irrigation facilities & other inputs to the tribal people through TSP funds.

9 Impact created through the programme:

- 1. Increase productivity due to change of cropping pattern.
- 2. Which help to increase socio-economic status of tribal people.
- 3. Get nutritious food through UUCs which directly effect on living standard of tribals due to increase per capital income.
- 10 Constraints in promoting/implementing the: 1. Less financial support through TSP programmes
 - grants
 - 2. Not timely released sanctioned grants.

11 Suggested strategies

- : Replace cropping pattern of tribal people i.e. Millet crops replace with Grain Amaranth, Ricebean i.e. Plantation crop replace with Simarouba
- 12 Photographs showing activities, newspapers clippings in different languages (especially in local)

PHOTOS

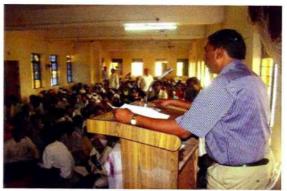

CSK Himachal Pradesh Krishi Vishwavidyalaya, Palampur 176 062

Centre Name : CSKHPKV, Palampur, Himachal Pradesh

Place of programme with district and State : Sangla, Disstt. Kinnaur

2. No. of training programme : 1(One)

Funds utilized : Rs. 52,620

3. No. of participant in each training programme : 50 along with the local Panchayat leaders along with names of dignitaries, if any

4. Types of Tribal & Tribal population of the state covered and their source of livelihood:

According to Surveyor General of India, the total area of Himachal Pradesh is 55673 square Kilometer which is divided into twelve administrative districts. Out of this total area, 32,271 square Kilometer is measured area according to revenue records of the Pradesh. The total population of Himachal Pradesh according to 2001 census was 6077900 and a density of population is 109 persons per square kilometer. The Scheduled Tribe population of the Pradesh which has its concentration in districts of Kinnaur and Lahaul-Spiti, Pangi and Bharmour parts of Chamba and scattered in other district is 2,44,587 according to 2001 Census which is 4.02% of the total population of the State. More than 50%, the State's tribal population falls under the Scheduled Areas of the State. There are vide variations in Area and Population figures of the districts.

The main stray of the people in Himachal Pradesh is Agriculture on which 65% population depend. The Kinnaur and Lahaul-Spiti districts, in their entirety, and Pangi and Bharmour (now tehsil Bharmour and sub-tehsil Holi) Sub-Divisions of Chamba district constitute the Scheduled areas in the State, fulfilling the minimum criterion of 50% S.T. population concentration in a C.D. Block. These are situated in the north and north-east of the Pradesh forming a contiguous belt in the far hinterland behind high mountain passes and are amongst the remotest and most inaccessible areas in the State with average altitude being 3281 metre above the mean sea-level. The most distinguishing mark of the tribal areas in the State is that they are very vast in area but extremely small in population with the result that per unit cost of infrastructure activity is very exorbitant. The district of Kinnaur is located between 31°-05'-55" and 32°-05'-20" north latitude and between 77°-45'-00" and 79°-00'-50" east longitude. The District Lahaul-Spiti is situated between north latitude 310-41'-39" and 320-59'-57" and east longitude 760-40'-29" and 78°-41'-39". The Pangi Sub-Division of Chamba district falls between north latitude 32°-33' and 33°-19' and between east longitude 76°-15' and 77°-21' and the Bharmour sub-division of this district is situated approximately between the north latitude 320-11' and 320-41' and between the east longitude 76°-22' and 76°-53'. Snow glaciers, high altitudes and highly-rugged

terrain, criss-crossed by fast flowing rivers and their tributaries are the peculiar features of the Tribal areas.

5 Trial Agricultural scenario like crops of: Main occupation of the tribal people is cultivation etc.

Main occupation of the tribal people is agriculture. Since the lad is hilly so terrace farming is practiced here. Major Crops of the area are apple, potato, peas, fench bean. Kala zira, saffron, Buckwheat, amaranths and chenopodium is also grown here.

6 Gaps in Economics & Nutritional empowerment:

Incidence of poverty among ST's is very high. It is because of most of the tribals have meagre productive assets and there is no access to sustainable employment and minimum wages. Malnutrition is also very common in among the tribal population especially women and children. Most tribal women suffer from anaemia affecting their working capacity and increase susceptibility to diseases. The diets are deficient in calcium, Vit A, riboflavin and iron.

What is TSP intervention to support these issues by promoting programmes on UU Crops:

By implementing TSP programmes the economic and nutritional status of the tribal people can be improved. Since underutilized crops like buckwheat and amaranths are rich in iron, calcium and other essential nutrients, their use in regular diet will improve nutritional status. Different value added products of these crops can fetch high prices resulting in their economic and social upliftment.

8. What kind of programmes that have taken up under TSP any suggestion to make it more effective:

Our centre has organized one day training programme on the improved cultivation practices and value added products of buckwheat, amaranths and chenopodium. Finances should be released in time so that training programmes can be implemented before the snow fall which creates difficulty in the transportation facilities.

9 Impact created through the programme:

Awareness was created among the tribal people about the improved cultivation practices including the improved and high yielding varieties of the underutilized crops. Preparation of value added products of these crops will definitely revive the cultivation which has declined over the years due to diversification of the agriculture.

10 Constraints in promoting/implementing the programmes:

Finances should be released in time so that training programmes can be implemented before the onset of winter which create difficulty in the transportation.

11 Suggested strategies : More funds, to provide inputs required for

growing UU Crops by tribal people

12 Photographs showing activities, newspapers: Enclosed clippings in different languages (especially in local)

PHOTOS

College of Forestry & Hill Agriculture (GBPUAT), Ranichauri 249 199

1. Centre Name : College of forestry and Hill Agriculture. Hill Campus Ranichauri, District Tehri Garhwal, Uttarakhand- 249199

Place of programme with district and State

: Dubakoti, Kotdwara, Moan, Jagdhar, Manda, Kainchu

2. No. of training programme : One training, three days

Funds utilized

: Rs. 46,700

3. No. of participant in each training programme : 30 Farmers participation along with names of dignitaries, if any

4. Types of Tribal & Tribal population of the : state covered and their source of livelihood

- A. Garhwal Jaunshari, Bhotia, Tharu, Buksa and Raji
- B. Kumaun- Bhotia, Tharu, Buksa and Raji
- C. Tribals population of the state covered: 29 per cent
- D. Source of livelihood: Agriculture
- 5 Trial Agricultural scenario like crops of : Pseudocereal, Millet Crops, cultivation etc.

Pulses, Cereals, Oil Seeds, Vegetable Crops, Horticultural Crops

6 Gaps in **Economics** & empowerment

Nutritional: In Uttarakhand, livelihood of most of the population depends on agriculture but the productivity of the crop in per unit area is very low due to lack of scientific knowledge of agricultural activities.

7 What is TSP intervention to support these issues by promoting programmes on UU Crops

TSP Project create awareness among the tribal farmers to cultivate the underutilized crops such as Grain Amaranth. Ricebean. Buckwheat. Chenopodium, Perilla and protect their health by utilizing these nutritional crops.

- 8 What kind of programmes that have taken up : 1. Film Demonstration under TSP any suggestion to make it more

effective

- : 2. Intensive training programme at On-Farm.
 - 3. By back of produce

9 Impact created through the programme:

- 1. Increase the area of underutilized crops.
- 2. Increase the production and productivity
- 3. Increase knowledge about nutritional value of crops.
- 4. Conserve the germplasm in situ condition

10 Constraints in promoting/implementing the programmes:

- 1. Transportation
- 2. Difficult to reach the tribal village
- 3. Lack of education
- 4. Small land holding
- 5. Non beneficial of agricultural crops cultivation
- 6. Lack of awareness
- 7. Migration of young peoples

11 Suggested strategies:

- 1. Create awareness for underutilized crops
- Check the migrants by providing work to make value added product of underutilized crops
- 12 Photographs showing activities, newspapers : Enclosed clippings in different languages (especially in local)

Soligas, Jainukuruba, Kadukuruba, BettaKuruba

The details of different tribes in different states in India are given in the tables and annexures

5 Trial Agricultural scenario like crops of : Finger Millet, Maize, Grain Amaranth, cultivation etc.

Coffee, Minor millets, Red gram

6 Gaps **Economics** in & Nutritional: empowerment

The tribes are economically nutritionally have poor status. The tribals are under nourished with low Body Mass Index (BMI) and poor health

7 What is TSP intervention to support these issues by promoting programmes on UU Crops

Introduction of improved varieties of Grain Amaranth, Training on preparation Value added products from Grain Amaranth

8 What kind of programmes that have taken up : under TSP any suggestion to make it more effective

Awareness programme to promote Grain Amaranth as potential nutritional crop for tribal food and health security.

Suggestion: To make the programme more effective funds to provide inputs to grow the crop required.

The funds should be released in the beginning of the financial year to plan the programme very effectively

- 9 Impact created through the programme
- The tribals are convinced on the utility of grain amaranth and they wish to grow Grain Amaranth as pure crop or mixed crop in finger millet.
- 10 Constraints in promoting/implementing the : Ill-literacy, small holding, poor financial programmes

Ill-literacy, small holding, poor financial status of tribal, unavailability of improved technology of crops, poor extension network etc.

11 Suggested strategies:

The funds should be released in the beginning of the financial year to plan the programme very effectively.

To make the programme more effective funds to provide inputs to grow the crop required.

Birsa Agricultural University, Ranchi 834 006

1. Centre Name : BAU, Ranchi (Jharkhand)

Place of programme with district and State : 4 (Ranchi, Palamu, Gumla, East

Singhbhum)

2. No. of training programme : 10

Funds utilized : Rs. 72072/-

3. No. of participants in each training : Ranchi - 159 programme along with names of dignitaries, if Palamu - 25

any

Gumla - 24

East Singhbhum) - 20

4. Types of Tribal & Tribal population of the : The major tribal groups in this region are state covered and their source of livelihood

Santhal, Oraon, Munda, Ho, Birhor,

Bhumij, kharia, Bedia, Chero, Lohra, Birjia

etc.

5 Trial Agricultural scenario like crops of cultivation etc.:

The livelihood systems are primarily dependent on combinations of agriculture, forests and labouring. Farming is mainly single crop with some paddy and vegetable cultivation. Paddy, vegetables are cultivated nearly year round and overall food security can extend from five to seven months. Fababean and kankoda in some districts of Jharkhand remain an important revenue generation crops among the tribals. Ricebean is known as major botic and abiotic stress tolerance pulse in the region. As far as grain amaranthus is concerned more awareness programme is to be needed for general cultivation for grain purpose among tribal people.

6 Gaps in Economics & Nutritional: The tribes are economically and empowerment

nutritionally have poor status. The tribals are under nourished with low Body Mass Index (BMI) and poor health

What is TSP intervention to support these issues by promoting programmes on UU Crops:

Ten short training/awareness programmes were conducted on creation of awareness on total package of practices of different underutilized crops generally grown in rabi season. Training also included improved crop varieties, methods of cultivation to ensure sustainable and good quality marketable crop produce for ensure increase income by better use of different underutilized crops in the forms of various products and generation of income through marketing these. In each training programme 20-30 tribal farmers have been trained in each session. The programme was

also supported by village Mukhias, Pachayat seveks and local leaders and they present during the session

8 What kind of programmes that have taken up under TSP any suggestion to make it more effective

The training programmes should continue in future also along with providing some inputs required to grow and popularize suitable underutilized crops.

9 Impact created through the programme:

Overwhelming response by the farmers was observed during the training session. In some villages number of participation was larger than our expectation. About 100-115 farmers shown interest in sowing the improved varieties of Fababean and Ricebean by demanding the seed for coming season. Some field exposure field visit also been organized for beneficiaries to university farm (underutilized crops section).

10 Constraints in promoting/implementing the : Ill-literacy, small holding, poor financial programmes

Ill-literacy, small holding, poor financial status of tribal, unavailability of improved technology of crops, poor extension network etc.

11 Suggested strategies:

The training programmes would certainly improve the socio-economic condition of the tribal farmers by adopting cultivation of Underutilized crops. The programme should continue in future also so that beneficiaries be more. It will be further strengthened by providing them improved varieties of different underutilized crops. Specific pockets in the state are to be identified where specific underutilized crops are grown.

12 Photographs showing activities, newspapers : Enclosed clippings in different languages (especially in local)

PHOTOS

Summary on constraints, suggestions, impact created and suggested strategies

Constraints:

Ill-literacy, small holdings, poor financial status of tribal, unavailability of improved technology of crops, poor extension network, market for the produce and their attitude to shift towards modern agriculture. Traditional food habit etc.

Suggestions:

- The funds should be released in the beginning of the financial year to plan the programme very effectively.
- To make the programme more effective funds to provide inputs to grow the underutilized crops
- To create market link in urban areas for the produce of underutilized crops produced by the tribals.
- 4. Large scale free field demonstrations, organizing Awareness & Field Day programmes involving more number of tribals during cropping season.
- Displaying visual charts and boards in the tribals areas to disseminate information and importance of underutilized crops
- Organizing more tribal site based training programmes on preparation and use of value added products of underutilized crops involving food and nutrition scientists

Impact created by the programmes:

- 1. The tribals are encouraged to take up cultivation of underutilized crops.
- 2. The nutritional importance of underutilized has been convinced through training programmes
- The awareness programmes have created confidence among the tribal farmers on the importance of high yielding varieties of underutilized crops
- After conducting the field demonstrations on large scales the impact studies will be conducted to generate more information

Table 6: Incidence of Poverty among STs in Different States.

Incidence of Poverty (%)	States
Extremely High (> 50)	Orissa, Jharkhand, M.P. (Including Chhattisgarh)
High (35 to 50)	West Bengal, Maharashtra, Assam, U.P (Including Uttarakhand)
Moderate (20 to 30)	Andhra Pradesh, Gujarat, Karnataka, Rajasthan
Low (< 20)	North- Eastern States

Annexure

Information on Tribal Support Project under the AICRN on Underutilized Crops

S. No.	Description	Location	Estimated cost of the project	Fund released under TSP (2011-12)
1.	Popularization of Kankoda, Rice bean and amaranth among tribals of Chhattisgarh	IGKV, Ambikapur	1,68,000	1,68,000
2.	Creating awareness on growing and use of Grain Amaranth in Selected tribal areas of Karnataka state	UAS, Bangalore	1,83,900	1,83,900
3.	Awareness generation programme (Grassroot training) on underutilized crops in tribal areas of Odisha	OUAT, Bhubaneswar	1,00,000	1,00,000
4.	Popularization of cultivation of Grain amaranth in tribal belt of Rajasthan	SKRAU, Mandor	1,00,000	1,00,000
5.	Popularization of cultivation of Grain amaranth in Tamil Nadu state	FCRI, Mettupalayam	1,87,500	1,87,500
6.	Demonstration of improved cultivation technology and value addition of underutilized crops	CSK HPKV, Palampur	71,000	71,000
7.	Awareness programme for cultivation of Kankoda and Grain amaranth in Maharashtra state	MPKV, Rahuri	1,85,700	1,85,700
8.	Training on improved crop varieties, methods of cultivation to ensure sustainable and good quality marketable crop produce for increased income through use of different underutilized crops	BAU, Ranchi	1,00,000	1,00,000
9.	Training programme on production technologies of underutilized crops for hill tribals of Uttarakhand state	GBPUAT, Ranichauri	1,02,900	1,02,900
10.	Awareness generation in programme on Grain amaranth cultivation in Gujarat state	SDAU, S.K. Nagar	2,01,000	2,01,000
	Total		14,00,000	14,00,000

Tribal Agriculture in India
