

CO-0238 (KARAN 4)

The wonder variety of sugarcane

Developed at ICAR-sugarcane Breeding Institute,
Regional Centre, Karnal

IMPORTANT POINTS

- It is a **high yielding and high sugar content** variety, derived from the cross **Co LK 8102 x Co 775**.
- An **early maturing variety** for commercial cultivation in North-West Zone (NWZ) comprising the states of Haryana, Punjab, Western and Central Uttar Pradesh, Uttarakhand and Rajasthan.
- This variety has spread in the field at a much **faster rate** as it combines both high cane yield and better juice quality and hence is preferred both by farmers & sugar industry.
